Graded Quiz

Latest Submission Grade 100%

1. True or False: A Shiny app consists of two parts, the server that the user interacts with and the UI that powers the app.

1 / 1 point

☐ True

☒ False

✓ Correct

The server powers the app and holds the app logic. The user interacts with the UI.

2. Which two components of a dashboard happen on the front end?

1 / 1 point

☐ Analyze

☐ Serve

☒ Visualize

✓ Correct

In the Visualize component, you create graphs on the front end using the graphing library.

☒ Interact

✓ Correct

With the Interact component, you use front-end libraries to accept user inputs.

3. Complete the sentence: You use the Layout functions to organize _____ containing user interface elements in the application.

1 / 1 point

☐ Layouts

☒ Panels

☐ Inputs

☐ Outputs

✓ Correct

The Layout functions organize panels containing UI elements in the application.

4. When defining the server logic for a Shiny app, you define a function that includes which of the following parameters?

1 / 1 point

☐ input, plotOutput

☒ input, output

☐ input, response

☐ input, renderPlot

✓ Correct

The function in the server logic has two parameters: input and output.
